Igor Gassmann

igassmann.me | igor@igassmann.me
Remote | Switzerland

Product Engineer with 10 years of experience. I started a career in software engineering at 16. I initially worked at a Swiss college for 4 years, building products from ideation to launch.

Later on, I co-founded a startup in the US that went on to raise $1M. I architected and built a scalable video platform API with paid subscriptions and hired our first employee. For the past 6 years, I've been building and shipping products at startups.

Skills

- TypeScript
- React
- Next.js
- Tailwind CSS
- Turborepo

- GraphQL
- Node.js
- Go
- Docker
- PostgreSQL

Experience

Software Engineer | Inngest - Remote   Mar 2023 – Mar 2024

I helped build the Inngest Cloud Dashboard. A monitoring tool built with Next.js (App Router) and a GraphQL API (Go).

Software Engineer | Synthesis - Remote   Aug 2022 – Nov 2022

I led the development of an internal tool for reviewing student sessions which involved video recordings and generated transcripts through speech recognition.

Founding Engineer | Covalent - Remote   Dec 2021 – Jun 2022

I was responsible for designing and building Covalent's first web app.

Technical Co-Founder | Odeon - Remote   Apr 2018 – Dec 2020

- Architected and built a scalable REST API
- Architected and operated a cloud-native infrastructure
- Defined processes and systems for team communication and collaboration
- Helped define and design our product and features

Education

On Deck | First 50 Fellowship   May 2021 – July 2021

On Deck First 50 is an 8-week program for ambitious and talented professionals who want to land roles at breakout startups. It connected me to a global startup ecosystem with a stronghold in North America.

HEIA-FR | Apprenticeship in Computer Science   Sep 2013 – Jun 2017

HEIA-FR is a higher education institution based in Switzerland. I apprenticed as a Software Developer and was taught web development, system management, network design, and project management. I graduated with a Federal VET Diploma.

Awards

🥇 **1st Place in the 2016 Regional ICT Championships in Systems and Networks**

A Swiss championship on networks and computer systems. It was organized by ICT-Berufsbildung Schweiz, a recognized Swiss organization that is responsible for the education standards of Swiss IT professionals. During the competition, I was faced against other professionals to put in place a complete network and server infrastructure with the highest quality standards in a short time.

🥈 **2st Place in the 2015 Regional ICT Championships in Systems and Networks**
Same championship than above.

Work

Inngest | Web App

Odeon | Video Platofrm

Covalent | Web App

Athem | Creative Website
